DETAILED ACTION

Receipt is acknowledged of election filed on 2/16/07 and IDS filed on 1/17/06 and 7/16/04. Claims 1-20 are pending in the application and the status of the application is as follows:

Election/Restrictions

Applicant's election of group I in the reply filed on 2/16/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's election of olive oil drawn to first conditioning agent, almond oil as the third conditioning agent in the reply filed on 2/26/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 3 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/26/07.

Claims 9-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/26/07.

Claims 1-2, 4-8 are pending in the application and the status of the application is as follows:

Information Disclosure Statement

There is no copy of search report and therefore the search report cited on IDS dated 1/17/06 has been crossed out. The NPL cited on 7/16/04 has been crossed out since there is no publication date.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-2 and 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of U. S. Patents 4,999,187 ('187) and 5,843,193 ('193).

Instant application is claiming a composition for application to the hair using combination of three conditioning agents drawn to oils. Patent '187 teaches hair treatment compositions using olive oil and almond oil. Oils are known conditioning agents since they provide emolliency to the hair/scalp. See the abstract. Patent at col.1, ll 49-55, col.2, ll 15-30

teaches olive oil and almond oil for scalp. See also claims 1-3. The difference between the patent and the instant application is patent does not disclose meadow foam seed oil as the second conditioning agent. However patent '193 teaches hair dye compositions and also teaches using meadow foam seed oil. Patent at col.11, ll 40-54 teaches preferred compositions using fatty oil and the preferred oil is meadow foam seed oil. When dyeing compositions are applied to hair the dyes damage hair and therefore dyeing compositions also has oils to condition the hair. See example 1and see claims 16-17.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to prepare compostions of '187 and add meadow foam seed oil taught by patent '193 as the preferred oil in analogous hair compositions. One of ordinary skill in the hair care art would be motivated to add meadow foam seed oil with the reasonable expectation of success that combination of more oils provide better conditioning effect to the hair. This is a prima facie case of obviousness.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-2 and, 4-8 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2, 4-7 and 11-14 of copending Application No. 10/674,715. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending application is claiming compostions for hair using the same three conditioning agents as a product and the product comprising advertisement statement. The product advertisement is obvious since it is a marketing gimmick to attract the consumer.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
